## Swiss Watches, A Timekeeping Tradition

Minzenmay's introduces Bulova Swiss Watches to their range of quality products.

Since 1875 Bulova has brought passion, experience and technical excellence to the Watch and Clock industry.

Among Bulova's greatest achievements are the inventions of the Clock Radio in 1928 and the creation of the "Accutron" movement in 1960. "Accutron" being easily recognised by its tuning fork movement and has been acknowledged as the greatest step forward in 300 years of timekeeping.

1969 - Neil Armstrong and Buzz Aldrin place a Bulova "Accutron" timer in the Sea of Tranquility to send back all data transmissions from the moon surface.

Bulova Swiss continues the fine tradition in combining the best of the past with today's contemporary requirements.
