OUTDOOR LIVING *why wait for Summer*

Are you over looking at an outdoor area, a lifeless puddle with water, drab and waiting? Wanting the opportunity to bring it back to it's full potential is a yearning we all have. **Why Wait for Summer?**

When Spring arrives we need to get ready for our outdoor living - BBQ's with family and friends.

Lighting - One thing we can put into place even before Spring is lighting, exterior lighting. An up lit tree, ambient lighting, decking lighting, feature lights- all create a room outdoors. Water feature lights and submersible lights have an inner glow that attract people from the indoors to out. Wall spots with new envirolux globes and compact fluorescent lamps, can create an incredible ambience for outdoor living.

Furnishings are paramount for successful outdoor entertaining. Choosing these wisely, spending that extra amount for good timber and construction that lasts for years, determines the look and style of our exterior entertaining for years. Or investigate the new season all weather low maintenance cane range at INDOCHINE OUTDOOR - ideal for al fresco dining. Entertaining décor is important too. Candles, placemats, fun outdoor accessories- such as quirky trays and platters shaped like thongs, serving dishes and even wine glasses- with the stems like a bikini from BAY LIVING, make our Peninsula enviable.

But, of course, how do we enter these beautiful exteriors without the help of beautiful doors? Patio doors, sliding doors, bilateral doors- which do we choose to enter our newly created space? Careful consideration of foot traffic areas need to be attended to at the planning stage of the home. Accessibility to BBQ areas is paramount if building a new home- maybe a snug kitchen window- how simple!

Enjoy Spring and all of it's bonuses! - Ginger Hill

Future Windows, established in 1973, has years of experience in the design and manufacture of unique timber windows to suit customer's individual requirements, ideal for the Peninsulas conditions. No matter what the task, our dedication to quality & craftsmanship remains unsurpassed

Bring the Outdoors In

With the warmer weather fast approaching the time to look at making the changes to your home for the entertaining season is now. Future Windows specialise in 'bringing the outdoors in' with options such as bi-fold's and sliding stackers. These are also functionable all year round with double-glazing for energy efficiency available and single door openings for frequent use.

Future windows uses high quality hardware to compliment the high quality craftsmanship that goes into each of their windows / doors, this ensures a complete and reliable product that will maintain in all weather conditions especially that of the Peninsula lifestyle.

With over 30 years of experience and knowledge, the family owned and operated business is able to offer customers advice on what type of product would best suit their needs.
