

COLOUR *in the home!*

Do you wonder whether we are trapped within a colour theme?

Does the media dictate what are the new directions in colour?

Are we swayed by glossy magazines?

Do we stop to think what colours we are truly comfortable with?

Do we contemplate our partners' colour aspirations?

HEFTY QUESTIONS, particularly when we are surrounded by our colours in our own home.

The 60's, if you are young enough to remember, was a revolutionary time in colour-remember our kitchens, every cupboard door was a different colour! It took a lot of intestinal fortitude to create this. Why? Because paint was not so accessible, nor easy to mix, nor readily available.

Simply put, technologically, we are far advanced compared to the 60's yet we are no further forward in using paint creatively in our homes - to our own themes and inspirations. Paint couldn't be cheaper, easier to use, so accessible or easier to replicate. For instance, DULUX 3D Inspirations can reproduce a favourite colour (less than the size of a five cent piece) and name it whatever takes your fancy so it's uniquely yours!!

Colour is you. It inspires, it soothes, heals and envelopes you "and it's only a coat of paint". The easiest and cheapest form of decorating around and changed to a whim according to your needs. So how does this happen in your own home?

Virginia Shaw will show you how at a free workshop. Limited numbers only at DULUX 3D inspirations showroom in Mornington. Bookings through their Mornington store.

Where to Start!

Spring collections are arriving at Bed'n'Home in Mornington and it's all about color! Vivid yellows, oranges, blues and limes against crisp white. These days blue and green should be seen with nothing in between! Orange and red create an explosion of color and yellow and white just burst with Spring!"

Bednhome is such an exciting shop with an abundance of color and texture - but where to start? Will it be the bed linen? Maybe the cushions (which you just want to dive into!), perhaps the blankets or throws? You could start with the quilts and pillows or maybe you prefer bedspreads? Wherever you start make sure you look at everything including the fantastic range of giftware. They have beautiful bed linen which co-ordinate with fabulous cushions, bed runners and throws. There are also plain and quilted European pillowcases, quilted valances, bedwraps, cotton sheets, towels, dressing gowns, slippers and shower curtains. Then there are the clocks, lamps, paintings and so much more! Take your time and look around-it's wall to wall and floor to ceiling of goodies!
